

The Wright Institute  
Integrated Health Psychology Training Program IHPTP  
Postdoctoral Residency Fellowship

### **Description**

Since 2004, the Wright Institute's Integrated Health Psychology Training Program (IHPTP) has been preparing postdoctoral fellows/residents to work independently with advanced training and skills for best practices in clinical psychology within primary care and other community health settings.

IHPTP is sponsored and facilitated by the Wright Institute, an APA-accredited doctoral program in collaboration with partnering community health organizations throughout the San Francisco Bay Area. IHPTP is comprised of three levels of training: Practicum (P2, P3), APA-accredited Doctoral Internship and Postdoctoral Residency.

IHPTP provides clinical psychology professional training with the goal of developing the postdoctoral fellow's competence in practicing independently providing psychological services, training, supervision and administration within an integrated community health setting.

### **Application of Acquired Skills**

The postdoctoral residency training provides opportunities in the following: 1) clinical intervention in an integrated community health setting (exam room consultations, brief individual and group treatment; 2) collaborating with an interdisciplinary team of physicians, nurses, social workers, psychiatrists and other medical providers; 3) teaching in the weekly seminar and participation in the Diversity Committee Trainings; 4) supervision of practicum students; 5) leadership and administration (site liaison). Residents supervise practicum students on a weekly basis and function as site liaisons at participating health centers (managing referrals, site administrator)

### **Supervisor Training (Ongoing)**

Postdoctoral residents participate in a monthly supervision consultation training meeting. This meeting provides training in supervision, including best practices, ethical and legal issues, developmental framework for supervision, faculty consultation, and focused workshops on current research and interventions.

### **Postdoctoral Residency Weekly Sample Schedule (based on 40 hours)**

- 4-8 hr primary care consults alongside medical provider in exam rooms
- 12-16 hr individual visits
- 2-4 hrs supervision of students
- 1 hr site-specific group supervision of trainees
- 10 hrs administrative time (referral queue, seminar preparation, clinic liaison work, teaching)
- 3 hr individual supervision
- 1 hr group supervision
- 4 hr monthly training/meeting on supervision
